

AmeriCold Announces Multi-Vendor Consolidation (MVC) Program Expansion in Carthage, Missouri

Atlanta, GA June 14, 2007 – AmeriCold has increased the Carthage distribution center frozen capacity to accommodate rapid customer growth created by the expansion of the Multi-Vendor Consolidation program, which debuted in 2006.

AmeriCold's Multi-Vendor Consolidation (MVC) program is a proven supply chain solution that connects manufacturers of all sizes with the nation's major retailers and food service distributors to create fixed shipping schedules and truckload-based freight economies.

The Carthage frozen expansion provides for an additional 9,191 pallet positions of -10 degrees temperature controlled space.

AmeriCold, based in Atlanta, Georgia, is the nation's leading third-party supplier of temperature controlled supply chain solutions, with a national footprint of 104 facilities. The company handles 60 billion pounds of freight annually, has more than half a billion cubic feet of multi temperature capacity, and employs some 6,100 associates.

AmeriCold offers Multi-Vendor Consolidation, Temperature Controlled Warehousing, Transportation Services, National LTL Transportation, i-3PL™ Technology, Seasonal Product Storage and Distribution, Dedicated Facility Management and Supply Chain Optimization.
