

AmeriCold Announces Enhancements to Russellville, Arkansas Facility

Atlanta, GA June 1, 2007 – AmeriCold has upgraded its Russellville, Arkansas facility to accommodate customer opportunities and prepare for future demand for public distribution business in the Arkansas region.

Enhancements included racking reconfiguration, new racking and installation, additional Material Handling Equipment (MHE), and sprinkler systems. In addition, a new guard house and 50 new drop trailer spaces were added to accommodate increasing truck volumes at the facility.

The project was completed in May 2007.

AmeriCold, based in Atlanta, Georgia, is the nation's leading third-party supplier of temperature controlled supply chain solutions, with a national footprint of 104 facilities. The company handles 60 billion pounds of freight annually, has more than half a billion cubic feet of multi temperature capacity, and employs some 6,100 associates.

AmeriCold offers Multi-Vendor Consolidation, Temperature Controlled Warehousing, Transportation Services, National LTL Transportation, i-3PL™ Technology, Seasonal Product Storage and Distribution, Dedicated Facility Management and Supply Chain Optimization.
